Date: April 6, 2011

Re: Airway Management Data Collection Form

---

The Peoria Area EMS System is currently collecting data involving airway management where a King Systems Supraglottic Airway or ET Tube has been utilized.

This data collection process will be occurring from April 6, 2011 – December 31, 2011. During the data collection period, we are requesting an Airway Management Data Collection Form be completed and sent to the PAEMS office within 48 hours anytime a King Airway or ETT is utilized for airway management. The Airway Management Data Collection Form **does not** have to be completed if airway management is maintained using a nasopharyngeal or oropharyngeal airway.

The Airway Management Data Collection Form is available for download at <http://www.paems.org/forms/> under the subheading “Peoria Area EMS Forms”. Additional copies of the Airway Management Data Collection Form will be available in the EMS report room located in the Emergency Department at Saint Francis Medical Center.

Thank you for your assistance with this data collection process.

Regards,

*Stuart Schroeder*

Quality Assurance Coordinator
