

November 1, 2016

Hello Everyone,

It is our pleasure to announce, that in a collaborative effort to strengthen the learning environment and experiences offered to our EMS students, Peoria Area EMS has proudly partnered with the Jump Training Facility. As some of you may already be aware, the Jump Training Facility offers state-of-the art simulation environments, in addition to top-notch learning facilities. In keeping with this new partnership, Peoria Area EMS classes and education will soon utilize the outstanding facilities and opportunities that Jump has to offer.

Peoria Area EMS will be holding our Monthly Continuing Education in the Regional Transport Center at Jump. The Regional Transport Center (RTC) greatly advances emergency rescue and transport training for first responders. The RTC and its equipment allow the simulation of home rescues, vehicular extractions and transportation situations under various environmental circumstances often faced in the field.

- Garage with a fixed ambulance bay
- One-bedroom apartment with full kitchen, bathroom and entry stairs
- Space for a wrecked car
- Technology to mimic light, noise and weather conditions

Peoria Area EMS free training programs are designed to prepare individuals with the skills necessary to begin assessing and caring for patients at the scene of injury or illness. These classes are held on the first Wednesday of every month at Jump, beginning on January 4, 2017 from 6pm to 8pm. There is free parking in the front parking lot of Jump for the CE sessions. The Continuing Education classes are for all levels including FR-D, EMT-B, EMT-I, EMT-P and PHRN.

Please visit our website www.paems.org or contact our office 309-655-2113 for more information.

Sincerely,

Dale Tippett, EMT-P
