**The Association Between Emergency Medical Services Field Performance Assessed by High Fidelity Simulation and the Cognitive Knowledge of Practicing Paramedics**

1. What was the objective of the study?
  - Association between exam performance and field performance
  - Simulated emergency medical exam response
  - Safety index of field performance and exam
  - Evaluation of field performance exam
  
2. There are no known studies that assess the complex interplay between cognitive competency and paramedic field performance.
  - True
  - False
  
3. All ambulances in the study were only Basic Life Support staffed.
  - True
  - False
  
4. Emergency Medical Services professionals in North Carolina are required to pass the national certification examination.
  - True
  - False
  
5. Which of the following was not a scenario during simulation?
  - Diabetic seizure
  - Pediatric asthma
  - Sepsis
  - Pediatric head trauma

6. The conclusion of the study was an association between paramedic's performance and a cognitive examination.

- True
- False
